PETROL TUNING

We offer engine remapping, the modern version of chipping which is the correct way to safely tune a modern petrol engine. With our ECU remapping you get smooth and progressive power, with improved response, that can be tailored to your requirements. Angel Tuning are able to offer tuning services either at one of our outlets or at your location with our mobile tech team, who are fully equipped with the latest diagnostic equipment as well as a wide range of tuning hardware. Whilst we normally book 3-5 days in advance for mobile and 1-2 days for our outlets it depends when you book in as we can often get customers in earlier

BRONZE – Remap + Filter

Our first level package consists of our Engine Tuning service (ECU Remap) combined with an ITG Competition Air Filter (<http://www.angeltuning.co.uk/competition-air-filters.asp>).

SILVER – Remap + Exhaust

If you are looking to enhance the look and sound of your vehicle we can upgrade your exhaust system to a Longlife system made from 304 grade stainless steel. These exhausts are custom made to your tone (noise) level requirements and with the tail exit design of your choice. You will be required to take the car to the exhaust centre although we can also provide a pick up / drop off service at extra cost if required.

GOLD – Remap + Filter + Exhaust

By bringing all the elements together of the exhaust system and the air filter we can save you further money over individually priced items.
